

## **AutoClerk Cloud Computer Required Minimum Specs**

Operating System: Windows based PC with a minimum Operating System of Windows10 Pro.

Processor: 10th Gen Intel Core i5 Processor or better (CPU)

Memory (Ram): 8 GB of RAM

Storage: 250 GB Hard Drive or larger

Video/Graphics: Integrated or Discrete graphics processor capable of 1440 X 900 resolution, or better (1920 X 1080 *or* 1200 ideal).

Monitor: for notebook: 13" display for desktop: 19" widescreen flat-panel display

Network: RJ45 internet wired connection.

Macs are not recommended as most support techs use Windows PCs. Also, Shift4 needs their UTG software to run under a Window's environment to work properly.

Computers are recommended to be no more than 5 years old.

### **Internet Connection**

Internet Speed minimum 20MB up and 20MB down

Secondary Internet Connection: Since AutoClerk Cloud relies on the Internet, each property should have access to a smart phone capable of producing a "Hot Spot" or business line hot spot solution.

### **Browser**

Chrome is recommended since testing is done using Chrome. Windows Edge could be used secondarily but again Chrome is the recommendation.

### **Anti-Virus**

All hotels are required to have live anti-virus checking. Free versions do not supply live anti-virus checking.
